

Commercial Car Journal's Editorial Index for 1948

A comprehensive listing of all feature articles, free publications, shop hints published during the year, indexed alphabetically according to subject matter and cross indexed for convenient locating of material.

This handy guide will prove valuable to the fleetman in selecting tune-up data, technical articles, new equipment descriptions, operating stories, shop layout plans, and maintenance information of a wide variety.

A glance at the index will show the operator where he can obtain information for better control, operation and service of his vehicle. *First number following listing indicates month of publication; second, is page.*
